We Specialize in Everblooming Giant Carnations

Felsing's a Great Name in Carnations

Largest Collection of Carnations in America

Members of American Carnation Society

CARNATIONS ARE EASY TO GROW

In 1938 Mr. Felsing started to grow carnations as a hobby without any idea of commercializing carnation plants. At the beginning he raised beautiful plants and flowers of the well-known common varieties, some solid colors and some variegated. His garden and small green house were the point of interest of all his neighborhood. Not content with raising the ordinary carnations, he set up a small laboratory in which he experimented and by scientific planting, propagating, crossing and fertilizing he was successful in developing new and unusually beautiful blooms, never before shown anywhere.

These new carnations from then on became "The Felsing's Rare Carnations."

Having been approached by so many carnation lovers as well as commercial growers the firm of Felsing's Rare Carnation Gardens was born.

From 1941 on Felsing's Carnation Gardens have enjoyed a most prolific patronage from both the retail as well as the wholesale trade.

Today Felsing's Carnation Gardens boast of having the largest collection of carnation plants in the world, comprising over 350 different varieties. More varieties are created every season in order to keep up the interest and enthusiasm of Felsing's numerous clientele.

We reserve the right to substitute if out of certain varieties.

NEW VARITIES FOR 1949

New topaz, with pink	\$1.00
Light orchid, solid color	\$1.00
Very large white,	\$ 50
Coneman Light copper-helio-	\$2.00

with the red	\$3.00
Same-Jame Exotic new light apricot	\$1.00
Nother's Day New tangerine red, very wide bands of white, delicately touched with the red	\$3:00
TOTAL SUMMARY OF CALLENT DO	INITE

THE SUMMARY OF SALIENT POINTS

- 1. Always purchase named varieties from a reliable nursery or Carnation specialist.
- 2. Soil must be sweet and not acid.
- 3. Plant about 18 inches apart, if possible.
- Do not plant too deeply, only to the depth of the orig-
- 3. Select a spot where the carnations will have full sun, or
- 6. Do not plant them under trees, or next to a hedge.
- 7. Drop a tablespoonful of bone meal in each hole before
- To not use leaf mold or peat moss in the bed.
- 9. Do not have the soil too rich with steer or other animal
- TO Do not feed carnations any acid foods.
- 11. Nants should be irrigated instead of overhead watering.
- 12. Do not keep them too wet or too dry, a middle condition is needed.
- Garnations must be supported, wire holders being pretorable, not only for correct air circulation, but for easy landling.

Brief Summary of Salient Points (Continued)

- 14. Feed regularly with a non-acid, well balanced took not during the winter months.
- 15. Water when the surface becomes dry, so the grown does not become checked.
- Young plants should be pinched back to insure study stock, at least three times before letting them bloom.
- 17. They should have good drainage, to keep the soil from souring.
- 18. Spray regularly, carrying out a systematic program for pest elimination.
- 19. Cultivate, but not too deeply, only enough to allow the air to circulate freely around the roots.
- 20. In picking carnations, the blooms should be broken as tas down as possible. Break the blooms by hand and not a knife or snippers.
- 21. Pluck the flowers three quarters open for langer life, but not while still in bud.
- 22. Do not plant carnation in the same bed without first fumigating the soil or removing the old earth and replacing it with new loam.
- 23. Do not plant diseased carnations, for they will only contaminate the healthy ones around them.
- 24. All propagation should be done only during the cool months, from October to March.
- 25. To increase the size of the blooms, disbudding quired, especially around the crown buds.
- 26. Do not plant them in complete shade, the result will always be a weak, spindly plant.
- 27. A harmonious color scheme is paramount in a wall lapt garden.
- 28. The best blooming period is spring and fall.
- 29. It is not unusual for carnations to rest for a short time. In fact it is very good for them.
- 30. Do not shock your plants by cutting them back all at once, do it a little at a time, for best results. Agricultural lime or wood ashes will be fine to sweeten the zeil.

Here's The Answer to Your \$64.00 Question

MODERN 2 IN 1 PLANT TRELLIS OR HOLDER

COLLAPSIBLE, ADJUSTABLE EITHER AS A TRELLIS OR HOLDER FOR BOTH FLOWER AND VEGETABLE GARDEN

These collapsible plant supports can be adjusted into several shapes by the simple twist of the wrist, some of which are illustrated in this pamphlet.

There is no more need for tying plants or vines with the old-fashioned string method, for these super wire supports can handle all your problems.

They are made of heavy wire so they can be put in the hardest of soil without bending and have been approved by professional and amateur alike, as well as the wholesale growers, in fact they are the answer to the gardener's prayer.

1st—Because they are made square in order to avoid waste of space, giving the plants more freedom to grow.

2nd—Because they can be opened and put around the larger plants in order that they may not be broken, which often happens when a frame is forced over the top.

3rd—Because they can be made into several shapes to suit vines or plants.

4th—Because they can be used in pots and window boxes as well as in the ground.

5th-Because they are collapsible and can be hung

Flat Folded Hang It Away One Type

Shape for

Shaped Trollis

up on a nail in basement or garage and kept in good shape when not in use.

You will never go back to the old-fashioned stakes after using this MODERN 2 in 1 PLANT TRELLIS OR HOLDER, Remember, first, last and always be square with your plants and they'll be square with you. A sprawling plant or vine is no attraction in any garden, so keep yours strong and healthy with the MODERN 2 in 1 Plant TRELLIS or Holder now available.
